---

### Information Assurance and Information Technology Support Services – Prime

5SRC provides IA and IT support services to the Naval Hospital in Jacksonville, FL (NHJAX). Our personnel support maintaining the IA program across the NHJAX area of responsibility. We provide expertise in policy coordination, crisis and incident management, access control, log management, contingency and disaster recovery, DIACAP / RMF accreditation, IT security, vulnerability management and remediation, disposal, and training. Our support includes compliance assurance with IAVMs, CTOs, STIGs and all other applicable directives, regulations, requirements, manuals, and instructions.

- *Information Assurance*
  - *Information Security*
  - *IA Policy Implementation*
  - *SOP Development*
  - *Contingency Plan Development*
  - *Training*
- 

### Information Technology Services – Prime

5SRC supports the requirements of the Information Technology Services (ITS) Branch of the US Army Corps of Engineers, Huntsville Engineering and Support Center (CEHNC). 5SRC provides IT technical support and recommendations including technical assessments and reviews based on systems engineering analyses to the ITS Program team members. We perform research on various computer software, hardware, and technical services for required customer services. We identify technology issues and provide recommendations serving as the ITS Program technical advisors for IT commodities and technical services contracts. 5SRC provides state-of-the-art IT application and web support using a wide variety of languages and platforms. We analyze functional and technical user requirements, processes, procedures, and problems and make recommendations, develop IT solutions, and improve existing applications. We develop and provide application and web support training and user assistance. We provide web application and web content design, development, maintenance, and administration for multiple environments. 5SRC provides data modeling and analysis services on enterprise systems to enhance business processes and operations. We build and deploy data support tools and maintain metadata inventories and definitions for database file and table creation.

- *Requirements Analyses*
  - *Technical Assessments*
